Dear Friend,

In this global crisis, everyone is taking a step towards the betterment of the society. LEHS|WISH has been very proactive in the state of Rajasthan in the COVID-19 response activities. It played a critical role in facilitating the processes such as screening, immunization, and providing eSanjeevani consultations.

Bindubai is the eldest of the two siblings, who live with their mother Gamani Bai in the village of Keshar, sixty-seven kms away from Baran. Her father Veeran Singh, a laborer, passed away two years ago, which turned her life upside down.

Bindubai is emerging as a promising leader, and a great role model for all. She is a teacher, she is considered as an influencer, impacting the decision of many children, but lost two sons due to lack of access to quality medical facilities in the area.

The recognition from the NSUI fraternity is doing their best in creating a world free of fear surrounding the vaccine and the leaders across party lines. They are all coming forward to our Hon’ble Prime Minister of India has also taken the first step towards the betterment of the society.

In Madhya Pradesh, the TSU helped forty-nine facilities in completing their virtual assessment as per the guidelines of the Ministry of Health & Family Welfare, Government of India. They are also updated on the current medical trends and there is an immense drive towards the sensitization.

In the intervention states, such as Madhya Pradesh, Rajasthan, Uttar Pradesh, and Assam, the TSUs played a vital role in initiating digital health facilities in the state. In addition, they were actively providing technical support to state level National Health Mission (NHM) on monitoring, data review and analytics for better program management and decision making.

Health researchers agreed that a healthy lifestyle, prevention, and awareness go a long way in fighting the virus. The initiative has improved the health and hygiene practices of the girls and women. LEHS|WISH is also supporting the Government of Madhya Pradesh (GoMP) in implementing the Labor Room and Maternity Care projects.

The project on strengthening the PHC in Patrakar Colony Urban PHC in Jaipur is seeking to empower both patients and health service providers through this initiative. LEHS|WISH also became a part of the initiative of the RJ Health startup to introduce quality standards and share the learnings with the Government of Rajasthan.

The project team is working towards the NQAS certification. To achieve this, LEHS|WISH will address the capacities of PHC staff on various aspects to ensure sustained maintenance as well as management of introduced quality standards.

Khamani Bai has been suffering from knee pain since the past two years, she is a NREGA worker and also earns by renting her house. She is being approached by many women and young girls from her line for various advice. Her committed support to the LEHS|WISH Health team could see marginal improvement in the general health status of women in her area.

In Rajasthan, the TSUs helped in the digital transformation of the eSanjeevani project to provide telemedicine and teleconsultations to the community. The utilization of eSanjeevani is increasing in Assam. The TSUs have scaled from sixty-six d-HWCs to one hundred d-HWCs across four states, i.e., Rajasthan, Madhya Pradesh, Uttar Pradesh and Assam, that are providing an array of digital medical services.

A telemedicine machine was installed in Baran district to provide teleconsultations to the community. Currently, LEHS|WISH has scaled from sixty-six d-HWCs to one hundred d-HWCs across four states, i.e., Rajasthan, Madhya Pradesh, Uttar Pradesh and Assam, that are providing an array of digital medical services.

A teacher Bindubai, who is also an influencer, is impacting the decision of many children.

In Delhi, in consultation with GNCTD, a variety of information, education, and communication materials on COVID-19 were designed, developed, and distributed. More than eight lakh copies were distributed, that helped in sensitizing people about the COVID-19 and preventive, promotive, curative, and rehabilitative healthcare needs closer to the communities across the states.

In Assam, the important project of Labor Room & Maternity Care has been launched by the Family Welfare, Government of Assam, in recognition of its various COVID Response activities.

The main objective of the project is to strengthen these PHCs for achieving better health outcomes, and their scale up to the other states.

In the state of Uttar Pradesh, the project of NQAS certification is being implemented, and the team is working towards addressing the capacities of PHC staff on various aspects to ensure sustained maintenance as well as management of introduced quality standards, and share the learnings with the Government of Rajasthan.

The project seeks to empower both patients and health service providers through this initiative.
